

Liam Turner

Curriculum Vitae

Work Experience

Proteus Digital Health, Inc., Redwood City, CA
Visual Designer
July 2013 - August 2016

As a part of Product Experience Design team at Proteus, we are tasked with taking the company's complex technology and making it accessible and meaningful to both patients and physicians. We build experiences for users that allow them to harness the power of technology while going about their daily lives.

As a visual designer on this diverse team, my work spans many disciplines, including packaging design, product design, brand development, and communication design. My role enables me to work across the organization in an integrative capacity to focus on user-centered design.

Academic Technologies Design Studio, Chico, CA
Junior Designer
January 2012 - May 2013

My position as a graphic designer allowed me to work with a variety of on-campus organizations to better the students and staff of CSU, Chico. My duties included graphic, editorial, and environmental design for our clients. I worked on projects from initial conception to final production, regularly interacting with clients to understand their needs, intentions, and reactions.

The Orion, Chico, CA
Art Director
Spring & Fall semesters, 2011

CSU Chico's award-winning newspaper is a unique opportunity for students interested in editorial design, which allowed me to hone design and art direction skills. I managed a team of designers to produce a full broadsheet newspaper each week, and overhauled the newspaper's approach to news design with a redesign of the entire paper, creating a graphic standards manual and a set of design guidelines.
